

Source of Environmental Knowledge

Dear Conservationists and friends of Environment,

Welcome to the first edition of the Blue Building Foundation Newsletter.

This newsletter, which will be published fortnightly, will share technologies, developments and events in the field of the Environment. It will also give YOU the opportunity to submit reports and comments that you want to share with other similar minded people.

The Blue Building Foundation was created to support breakthrough environment technologies, assist in the development with the aim to take them to the world.

The Blue Building Foundation is committed to give 30% of the organization's net profit for investment into new technologies and developments that will help to sustain our environment.

Who we are?

The Blue Building Foundation (FZE) is a company, registered in Sharjah Airport International Free Zone, under the license no. 02-01-08623. The activity of the company is providing environmental consultancy and services.

Why is the Blue Building different from other so called Environment Groups?

Many companies carry in their names the word 'environment' or 'green' but are they truly Environmental companies or just using the tag to fatten their purses.

The founder and his partners want to do something *real* to change the environment. They have seen good Environmental ideas, inventions and developments fail to be realized due to lack of finances and support or pressures from conglomerates and International groups whose revenue will be drastically effected if these inventions are allowed to develop.

Hence they have taken the decision that 90 % of the net profit will be split as follows:

1. *one third will be used to finance environmental projects anywhere in the world,*
2. *one third will be used as a disaster fund to generate immediate emergency help for major events worldwide*
3. *one third will be used to promote International Environmental Awards as well as environmental education and publications. We need to educate our young on what is important*

Hand over a healthy world

**Our target should be to do the impossible,
to stop the progressing climate change;
and let's go back to the nature**

NEWS

Edition 1 Date April 10th 2011

The Blue Building Foundation (FZE) being an Independent organization is not tied to any government or other organization. Decisions on the allocation of funds will be at the discretion of the founders and the Advisory Board and will be spent as mentioned above regardless of nationality, culture, politics, religion or health.

Of course, the Blue Building Foundation will have to work with governments and organizations all over the world but will not be controlled by other groups. Our focus is and will remain to find the RIGHT solutions to change the environment in the BEST way.

What's Next for the Blue Building Foundation?

Firstly, our second construction project will be to build the most environmentally sensitive building in the world. This project will change the world. It will prove that there are viable, BLUE alternative methods of construction that will not harm our already damaged environment.

Net- Zero Passive House exceeding the German Passive House requirements by 20 %:

**Zero Energy required from outside sources.
No input needed – No output desired**

A silent reversible cooling/heating system instead of air conditioning

Thermally activated building mass

At the same time we are working on other unique developments such as:

1. A new amazing super insulation window system is being developed that will reduce the heat conductance to less than 0.1 . This development will take a further 5 months
2. The Blue Ecopower system. We are in the process of making the first prototype of this world changing device. More information available at:

<http://www.bluebuildingfoundation.de/english/blue-ecopower/>

The Future of Building Physics:
Gravity will remain 9.81 m/sec
A Watt will always be V x A
“Everything else will be changed
by the Pascal Stone”

Life is a journey, and health is not buyable,- the place of Blue Building is taking care of you, to live with nature combined.

For a better environment with future

Nobody knows what will be happen tomorrow. It seems that a natural or unnatural catastrophe occurs every week. Natural disasters we have to live with but we should not accept the unnatural disasters?

Today so many things are changing, views are changing, but are they changing quick enough ?

Just today, 25 years after the event, we learnt that 600 million people have been affected by the Chernobyl Nuclear incident, that is 85% of the population of Europe meaning i or part of my family have been affected.

The Ozone Layer issue.....

There are 3 schools of thought geometrically opposite

One school says, it is true and is the death knell of life as we know it while the second school says, it is true but nothing to worry about And then a third group say there is no hole in the ozone layer and that it is all a fabrication.

All three groups have doctors, professors and engineers backing their claims.

Who is right? Who do we believe?

One of the main tasks of the Blue Building Foundation will find the true answers to these questions such as this, consulting only the experts that have the true knowledge to answer.

Blue is life & life is more

With Focus on
the Environment
and the Eye for Details

Join us today

Obviously to achieve our goals the Blue Building Foundation needs funds, especially for the next inventions. The revenue generated from our inventions will fund our operation in the years to come but we must start somewhere.

There are investors and potential shareholders who are willing to invest into our foundation but to be truly independent we need to self finance ourselves but our plan is that the

Blue Building Foundation (FZE)

be funded by you, the Conservationists and our friends of Environment. The ones who truly care and wish to do something about our environment.

By banding together we can become one united powerful voice in the world. We are planting the seed we now need your help to grow and bear fruit.

Please forward this to all our friends and people you know whom may care about our Environment.
